Website URL

- Add the link to your website in the main menu, shown as below.

- Add the link in the drop down list of Help, shown as below.

Icon

Design the Icon of the installer and shortcut according to your website:

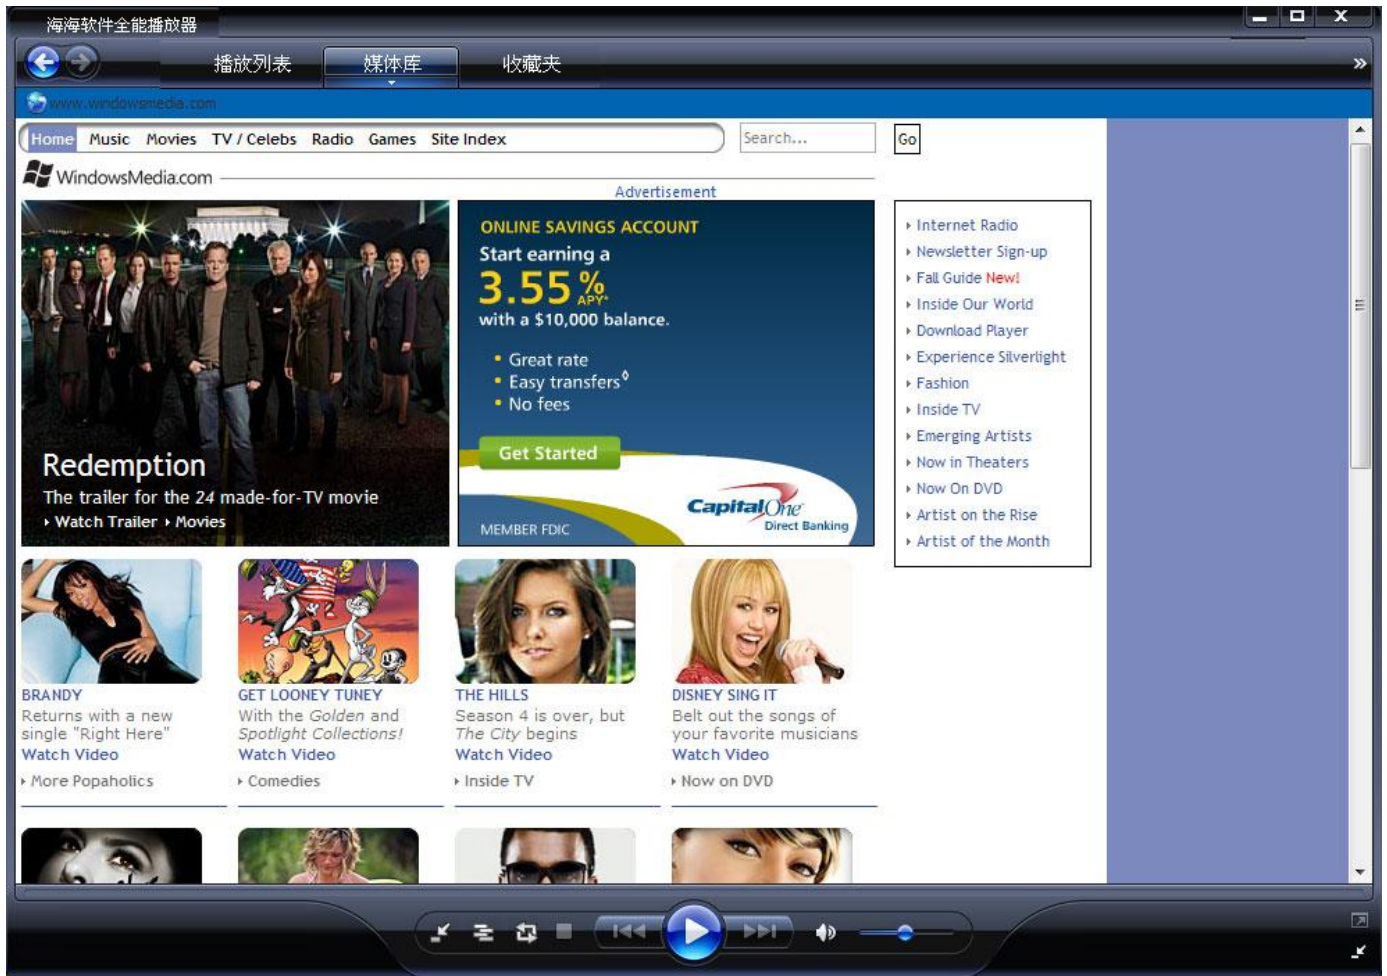

Read the Data from Your Database When Users Play Your Content

The player will read the information, including play list, caption, courseware information and so on from your database.

Add Media Library into the Player

You can list all your media contents in the Media Library, which will make it easier for your users to access your contents, shown as in the picture below.

Develop Other Customized Features for the Player

We can develop some other features such as add fund automatically in the player, offline authentication and so on.
