Hosting & Streaming

- 99.9999% Reliable and Cost-effective Hosting & Streaming With Vast Scalability

Haihaisoft has streaming servers in Shanghai China, Los Angeles United States, and Amsterdam Holland. Haihaisoft's robust, flexible infrastructure allows us to provide cost-effective solutions with unfettered scalability, setting Haihaisoft ahead of its competitors.
We offer content redundancy over a globally distributed network that's optimized for speedy video distribution. No matter what your file size, how popular your content is, or where on earth your audience lives, Haihaisoft guarantees controlled and reliable delivery.
Haihaisoft provides all our clients with 99.9999% uptime Service Level Agreements. Your video content is always available on-demand and delivered to the end user as quickly as possible, whether they're in New York, London, or Shanghai. Our streaming infrastructure is designed to do one thing well, and that's to distribute video over the Web. Other Web hosts claim they stream video at affordable prices, but if you look closely the services they offer are progressive downloads via their conventional Web-serving platform. This usually means a cheaper, slower, bandwidth that's generically used for everything else on your site and won't provide the special handling that speedy, high-quality video delivery requires.
Haihaisoft Cost-effective Hosting & Streaming support the following media format:

- Windows Media
- Real Media
- QuickTime
- Flash

Haihaisoft Solutions

Live P2P Broadcasting solutions

Haihaisoft Live P2P broadcasting solution that dramatically reduces the bandwidth needed. It solved the serious problem that live video broadcasting spends too much bandwidth, and helps you cut bandwidth costs by up to 90 percent.

With the significant growth in consumer broadband usage, increasing numbers of individuals and broadcasters are engaging in live streaming. However, in many instances this expansion has led to high bandwidth costs and decreased media quality. Haihaisoft Live P2P solves this problem through its advanced P2P software which allows broadcasters to create a network that utilizes unused viewer 'upload' bandwidth capacity.

Haihaisoft P2P Live Broadcasting Features:

- With Haihaisoft P2P Live technology. One server with 5 M Bandwidth supports 500,000 simultaneous users for one channel (512Kbps video).
- Improved buffer time dramatically. Haihaisoft P2P broadcast your live content simultaneous to all users and with very short buffer time. Usually 5 seconds or less.
- Supports Windows Media(WMV, WMA, MP3 file formats).
- Live DRM. Supports Haihaisoft Media DRM (Based-on Windows Media DRM) protect your live broadcasting.
- Improves reliability and quality of delivery. You can broadcast 700 Kbps high quality video streams.
- Haihaisoft Live client with very small size, only 1700 KB.
- Support various business models. Subscription, Pay-Per-View, and Preview and Purchase Content.
- Powerful Control Panel. Enable you create and monitor all visits and broadcasting status.
