

Haihaisoft DRM-X Plugin for Joomla

DRM-X

Haihaisoft DRM-X Plugin is for integrating Haihaisoft DRM-X with Joomla. Synchronize Joomla users to DRM-X platform and protect your Video/Audio/PDF far from piracy.

This tutorial will guide you in the process of integrating DRM-X with Joomla by the plugin and setting it up in a way.

So let's begin.

STEP 1

Download DRM-X Plugin for Joomla

Go to Download page on DRM-X.com and choose the **DRM-X Plugin for Joomla link** in the left menu:

http://www.drm-x.com/DRM_Joomla_Plugin.aspx

The screenshot shows the homepage of DRM-X.com, formerly XDRM. The navigation menu includes 'Welcome', 'Features', 'Demo', 'Download', 'My Account', 'Support', and 'Community'. On the left sidebar, there are links for 'Haiha soft Universal Player 1.0.x', 'Haiha soft Universal Player 1.1.x', 'DRM-X Audio/Video Packager', 'Haiha soft PDF Reader', 'DRM-X PDF Packager', and 'DRM-X Plugin for Joomla'. The main content area features a 'Haihaisoft DRM-X Plugin For Joomla - FREE Download!' section with a 'Download' button. The text describes the plugin's purpose: integrating DRM-X with Joomla to protect digital content from piracy. It also lists supported media formats like WMA, WMV, ASF, RM, RMVB, FLV, AVI, and RealMedia.

Click the Download button to down the plugin:

This is an identical screenshot of the DRM-X.com website as shown above. It highlights the 'Download' button for the Joomla plugin, which is used to obtain the DRM-X Integration Plugin for Joomla.

STEP 2

Log into your Joomla's Administrative Back End

After downloading the plugin installer, log into the back end by your user details:

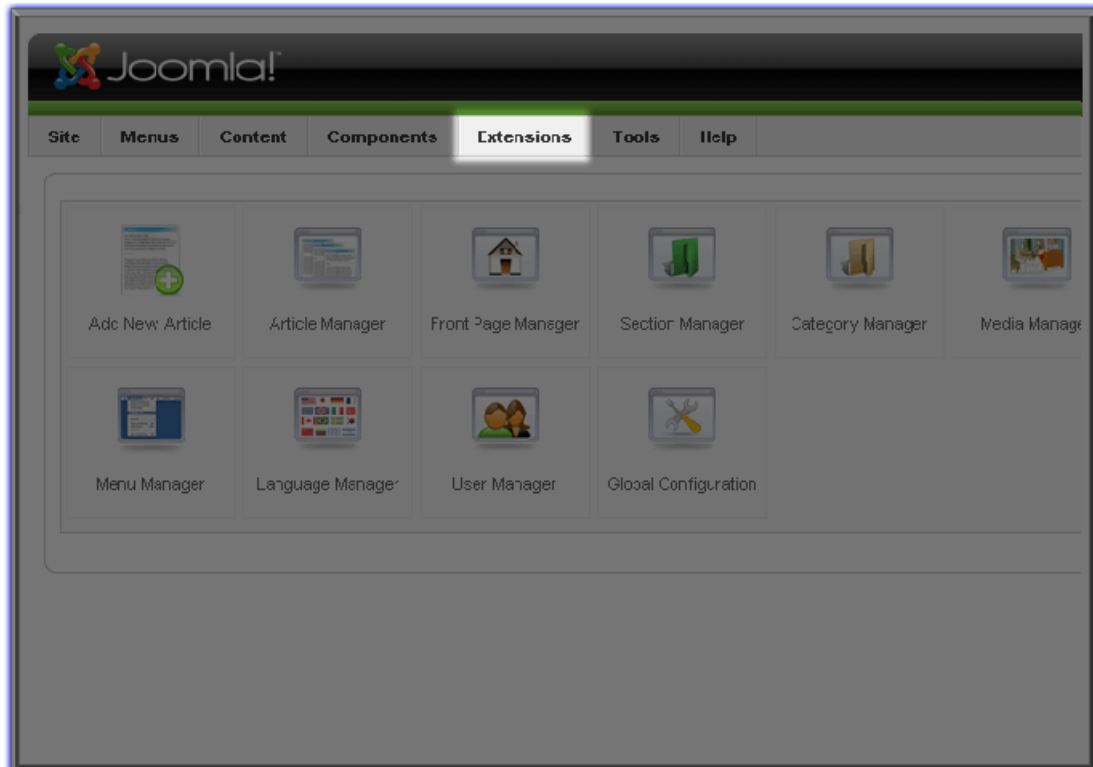

The screenshot shows the Joomla! Administration Login page. At the top left is the Joomla! logo. The main heading is "Joomla! Administration Login". Below the heading, there is a message: "Use a valid username and password to gain access to the Administrator Back-end." and a link: "Return to site Home Page". To the left of the login form is a large padlock icon. The login form itself contains three input fields: "Username" with the value "admin", "Password" with masked characters "*****", and "Language" with a dropdown menu set to "Default". A "Login" button with a green arrow icon is positioned below the form.

STEP 3

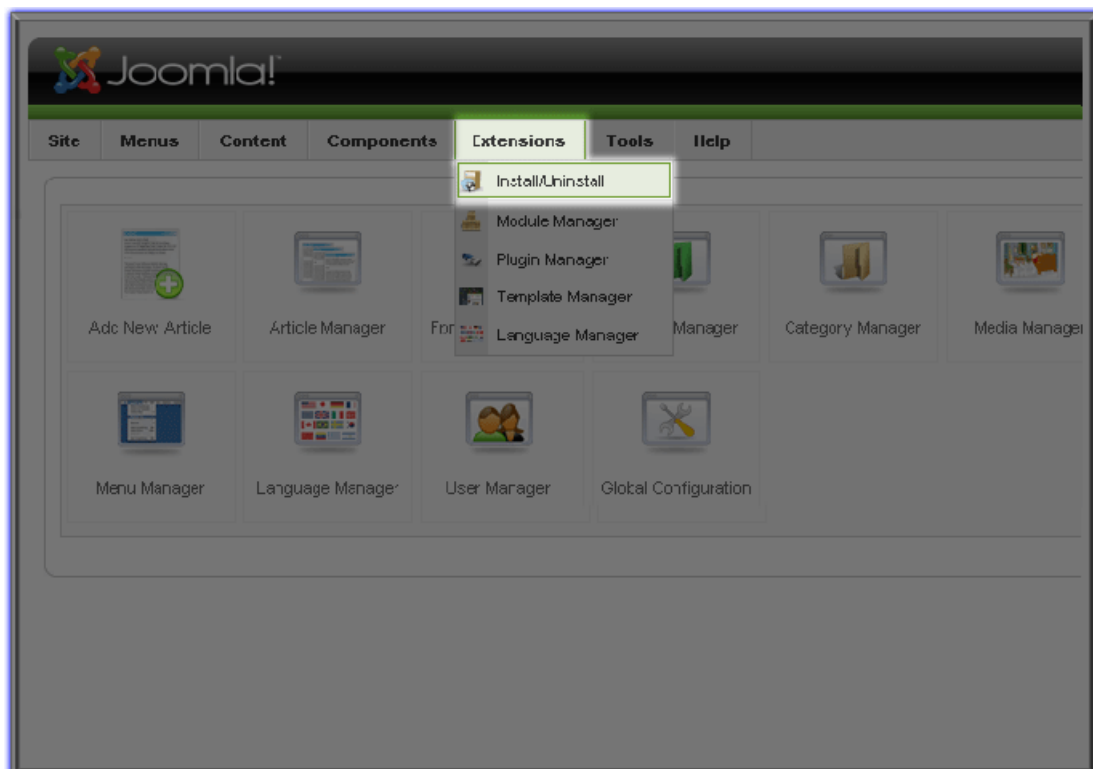

Install DRM-X Plugin

Go to the **Administrator Control Panel**. Navigate to the **Extensions** menu:

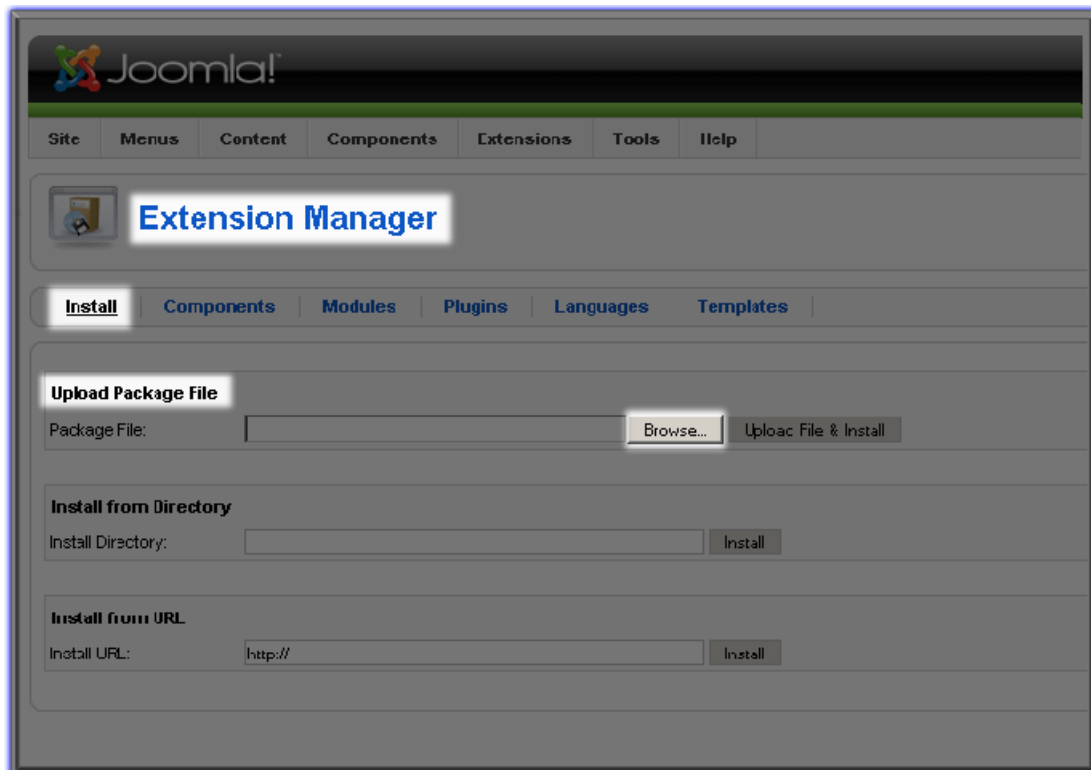

In the drop down list a menu item named 'Install/Uninstall' will appear.

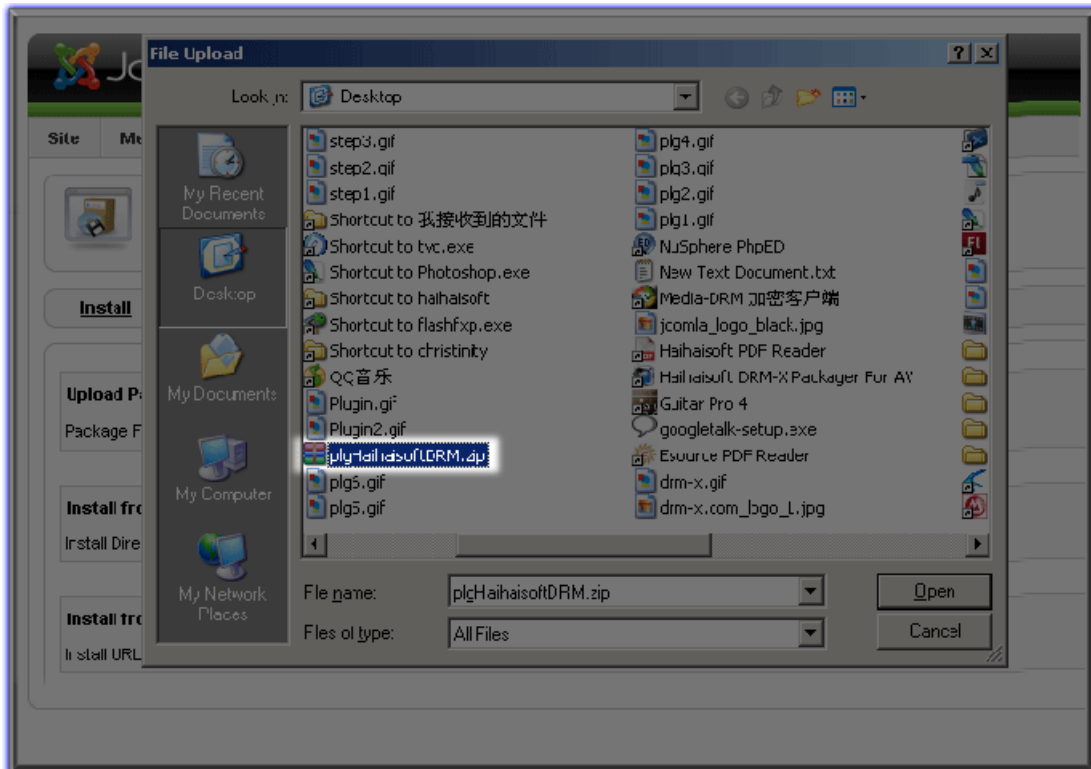

Click it:

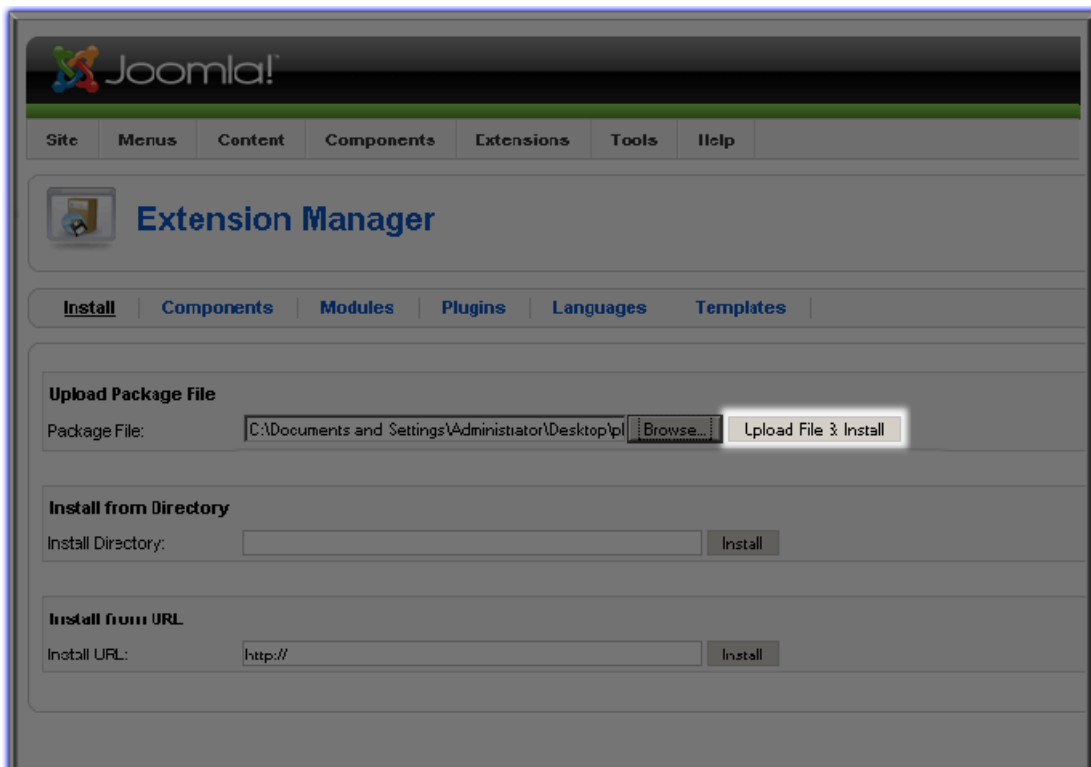

Once you reach the **Extension Manager**, you will see the **Browse...** button in the **Upload Package File** table under the **Install** menu. Click it:

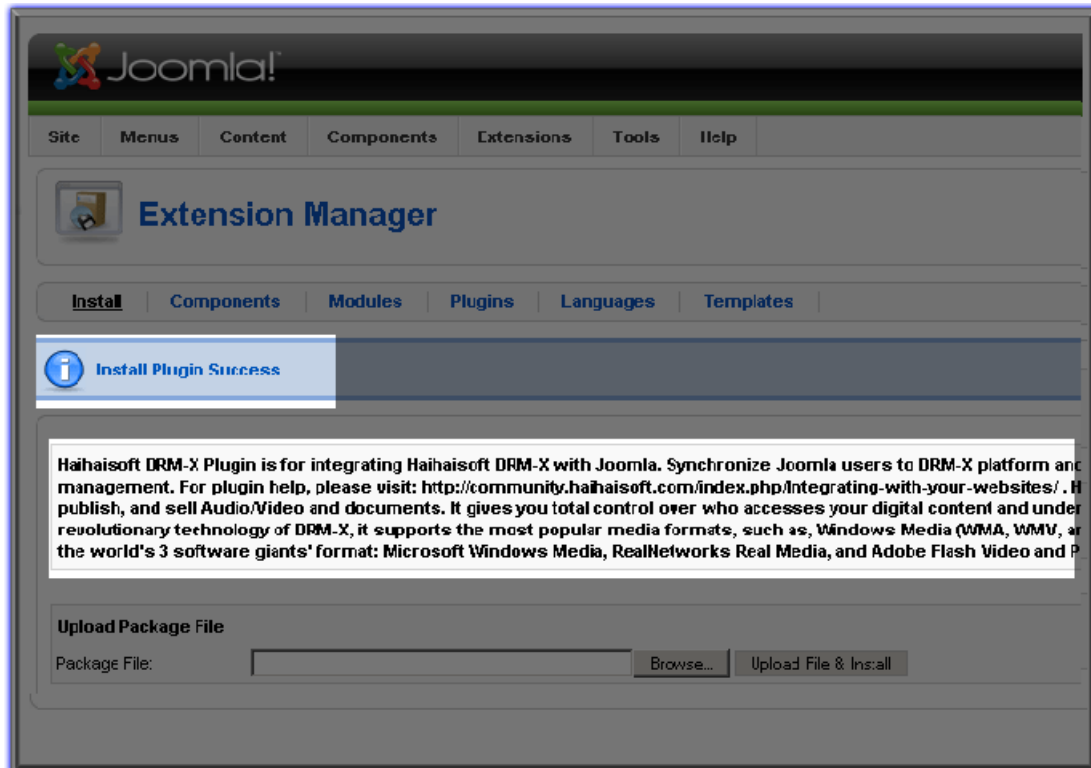

Choose the DRM-X Plugin Installer you downloaded just now, then click the **Open** button:

Click the **Upload File & Install:**

It shows you install the plugin successfully when you see the ***Install Plugin Success*** note:

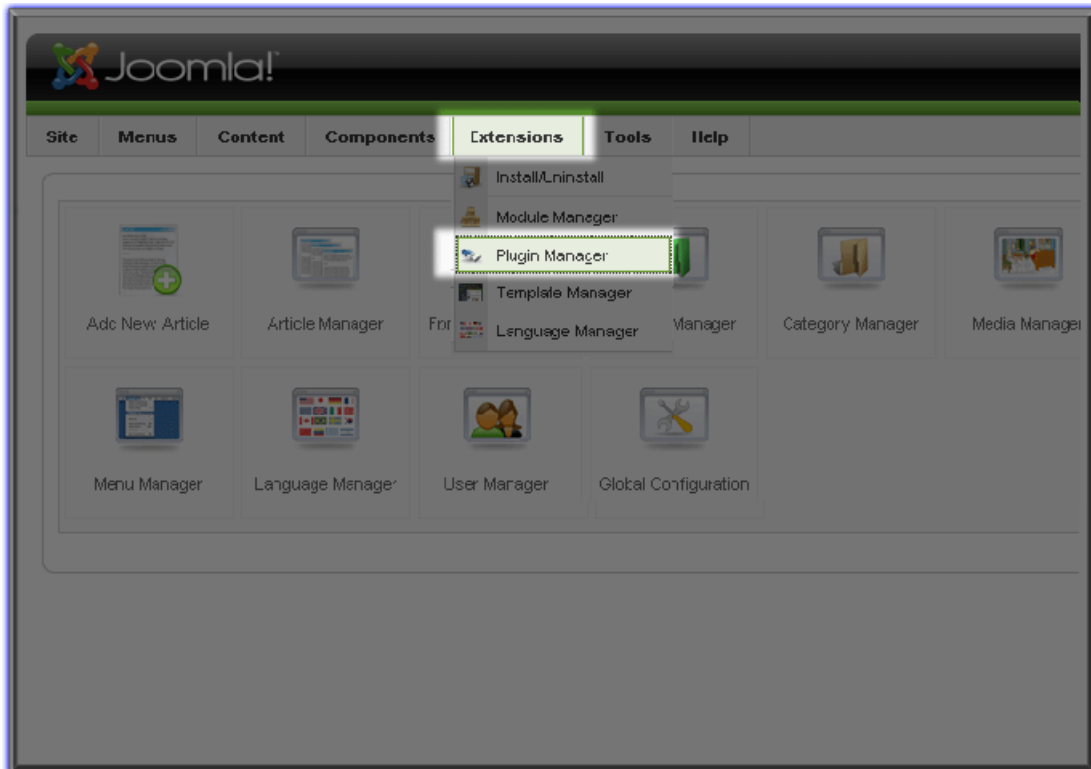

Congratulations!

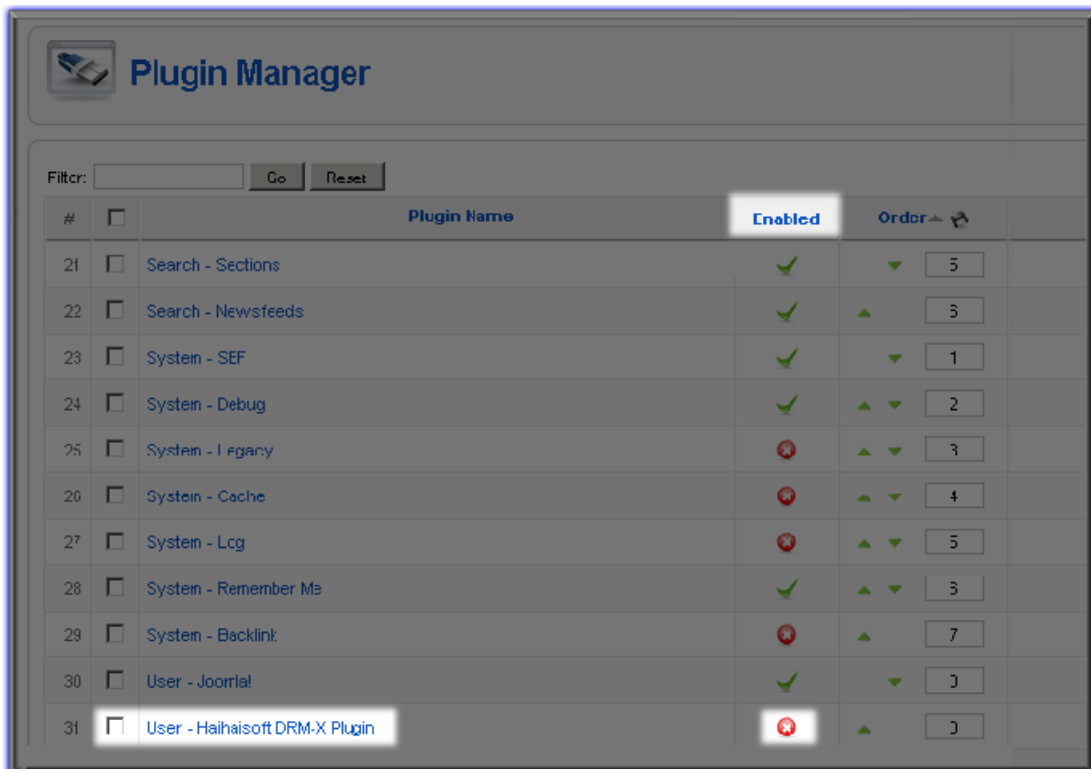

Enable the Plugin and Configure the Parameters:

Back to the ***Extensions*** menu and click the ***Plugin Manager*** menu item in the drop down list:

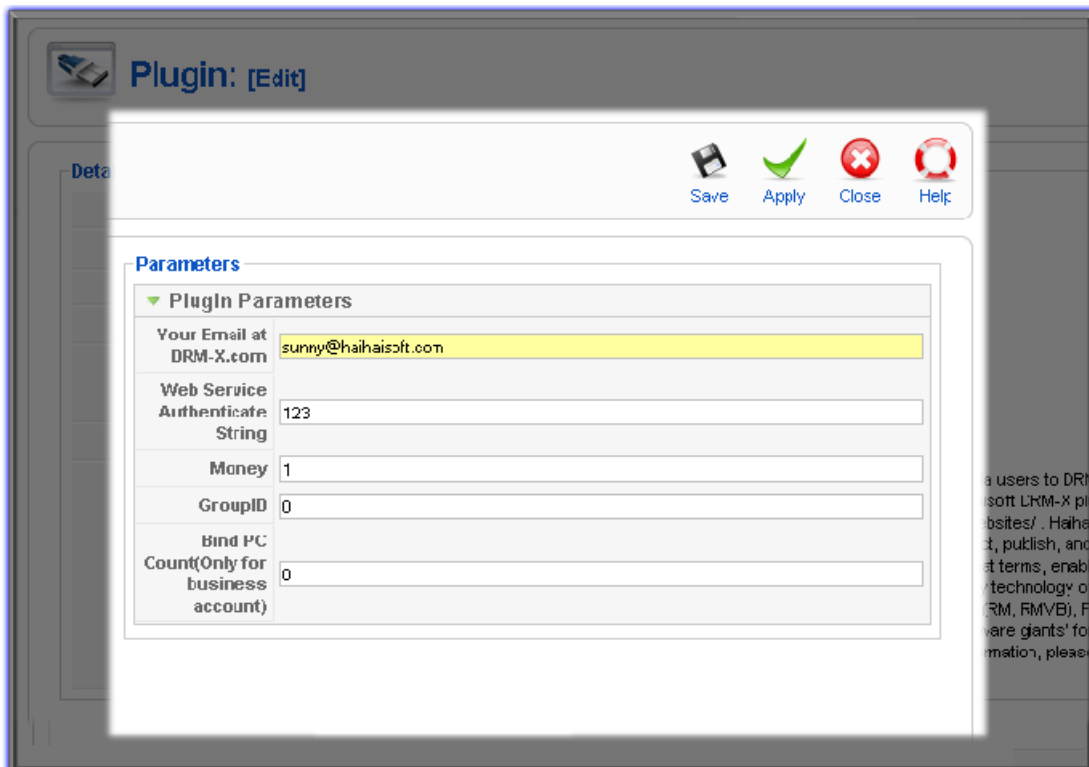

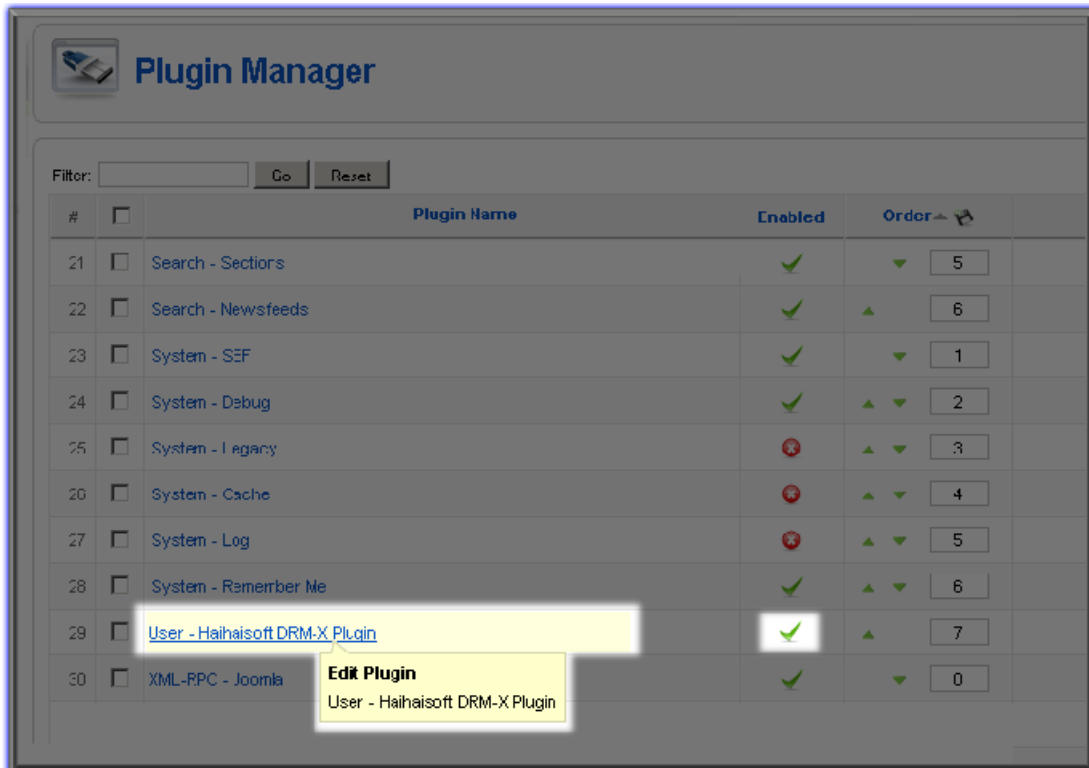

Here we come to the **Plugin Manager** page. Find the Haihaisoft DRM-X Plugin. Click the cross button in the same row to enable the plugin.

Now that we have enabled the plugin, it needs to be configured so that it

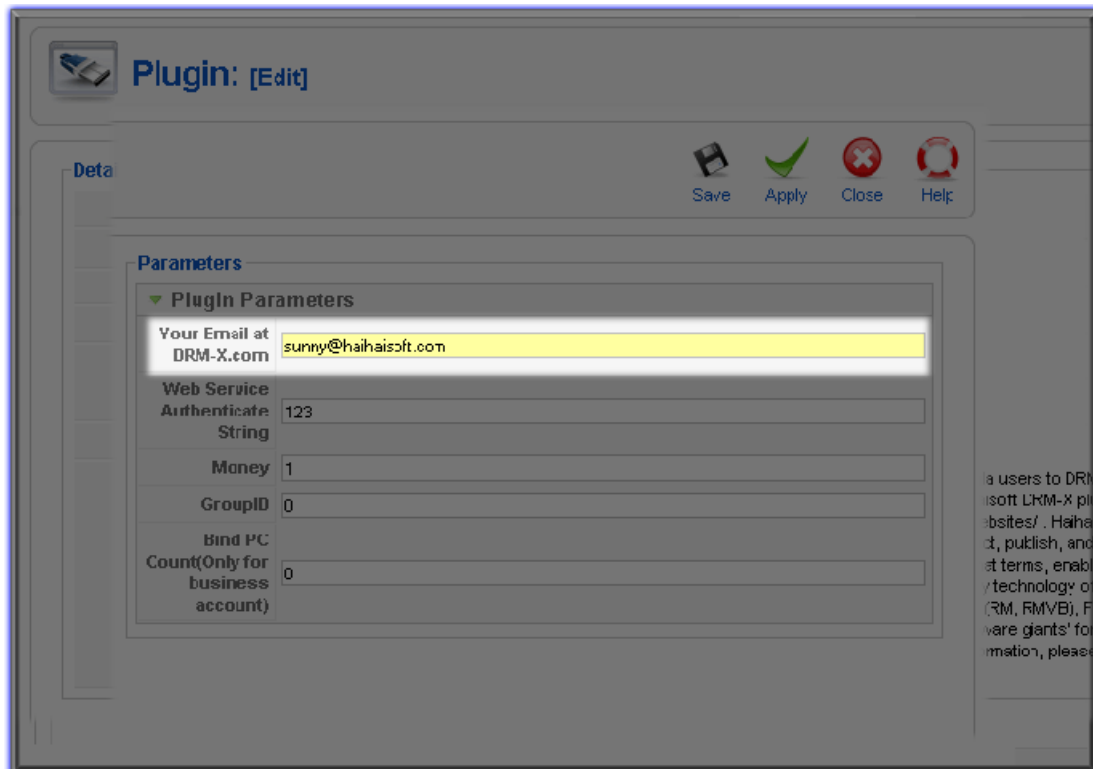

can synchronize Joomla users to DRM-X platform. Just click the name of the plugin and then we will reach the Plugin Edit Page:

Let configure the basic parameters.

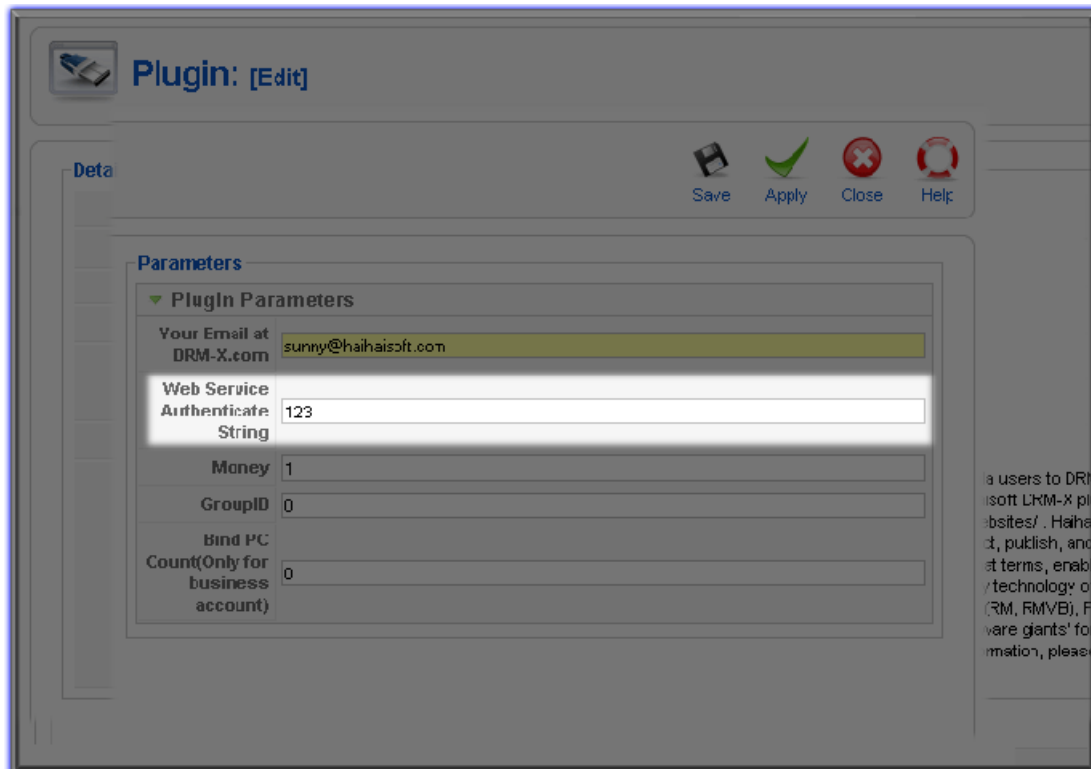

1. Your Email at DRM-X.com

Input Your DRM-X Account - your register email on DRM-X. The default email in this plugin is *Sunny@haihaisoft.com*.

2. Web Service Authenticate String

Web Service Authenticate String is used to authenticate if you are the have the right to integrate with DRM-X.

The string numbers or letters must be the same with the string on DRM-X.com. You can set it by this link on DRM-X.com:

<http://www.drm-x.com/SetIntegration.aspx?selection=6>

Profile - Website Integration Preferences

Do you want pop up your license window and integrate your system with DRM-X? If you choose keep set No. [Integration Help](#)

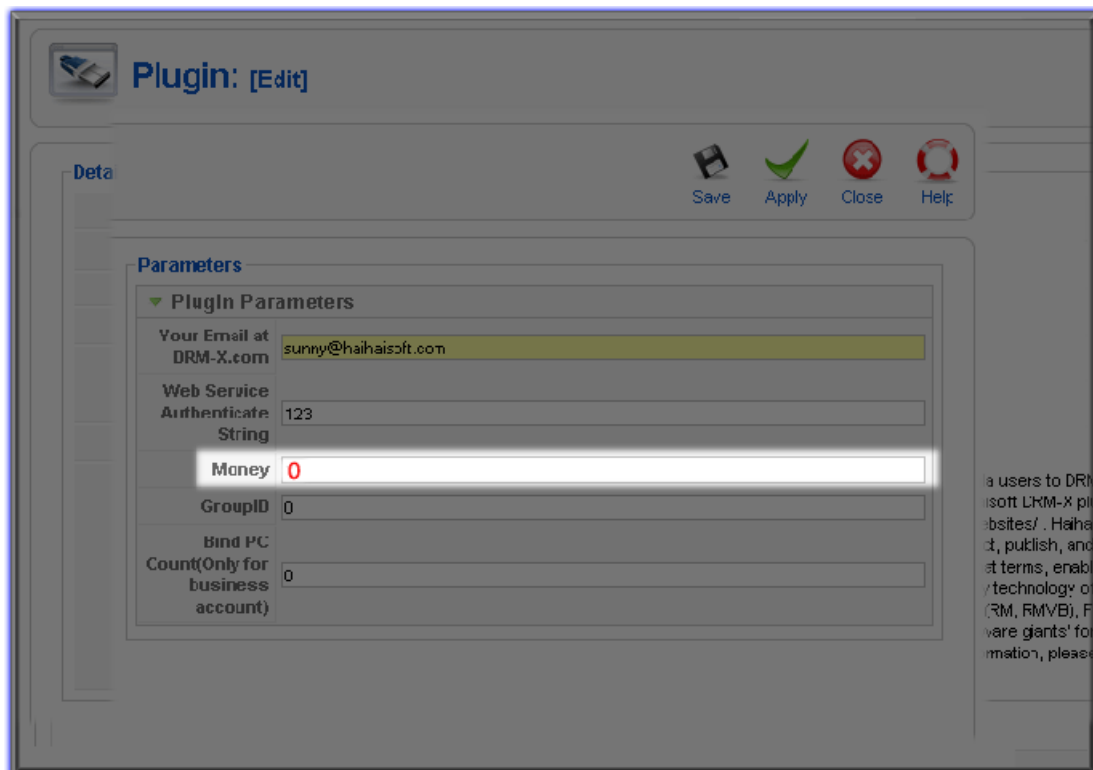

Yes No

Please enter License URL (License URL is the url used by pop window when acquiring license)

Please set a Web Service Authenticate String for DRM-X web service(DRM-X need you provide this)

3. Money

The number you input here will be set as the default account balance for your end users when they register to be your users. Normally, it should be '0'.

The screenshot shows the Joomla! administrator interface for editing a plugin. The title bar reads "Plugin: [Edit]". Below the title bar, there are four action buttons: "Save", "Apply", "Close", and "Help". The main content area is titled "Parameters" and contains a section for "Plugin Parameters". The parameters are listed as follows:

Parameter Name	Value
Your Email at DRM-X.com	sunny@haihaisoft.com
Web Service Authenticate String	123
Money	0
GroupID	0
Bind PC Count(Only for business account)	0

On the right side of the interface, there is a small text block that reads: "a users to DRM isoft DRM-X pl bsites/ . Haiha t, publish, and at terms, enabl / technology of (RM, RMVB), F ware giants' fo mation, please".

4. GroupID

Input the Group ID you have create in your DRM-X account. The group should be the one that you want your end users to be included in.

The screenshot shows the configuration interface for the DRM-X Integration Plugin. The 'Parameters' section is expanded to show 'Plugin Parameters'. The 'GroupID' field is highlighted with a red border and contains the value '90043'. Other fields include 'Your Email at DRM-X.com' (sunny@haihaisoft.com), 'Web Service Authenticate String' (123), 'Money', 'Bind PC Count(Only for business account)' (0), and 'Bind PC Count(Only for business account)' (0). The interface includes 'Save', 'Apply', 'Close', and 'Help' buttons.

The related Group in your DRM-X.com account:

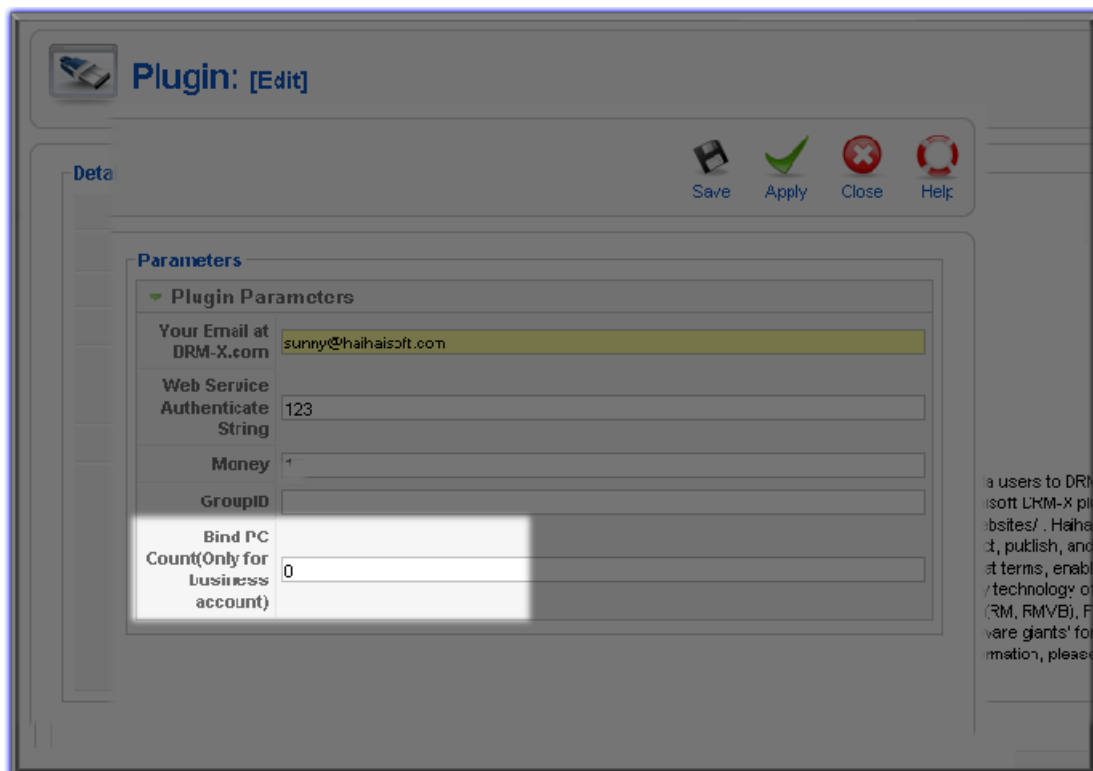

The screenshot shows the DRM-X.com user account interface. At the top, the logo 'DRM-X.com' is displayed with the text 'Formerly XDRM' below it. A navigation menu includes 'Welcome', 'Features', 'Demo', 'Download', 'My Account', 'Support', and 'Community'. The 'My Account' section is active, with a sub-menu on the left containing 'My Account', 'Account Home', 'User Group', 'Rights', 'License Profile', 'Users', 'Reports', 'Account Settings', and 'Protect Now NEW!'. The 'User Group' option is highlighted. The main content area is titled 'My Groups' and contains a table with the following data:

Group ID	Group Name	Group Users	Reports	Edit
90033	123	Uocro	Reports	Edit
90043	Default User Group4	Uocro	Reports	Edit

Below the table is a 'Quick Start' button. At the bottom of the page, there is a 'Need help?' link and a footer with navigation links: 'DRM-X Home - About Us - Fees - Affiliate Program - End User Account - Contact Us - Privacy Policy'.

5. Bind Count PC

The number responsible for the maximum quantity of computers you want to your end users to play your files. For instance, if you set it 3, that means the user can login his account and play your files on 3 different computers at most. If you don't need this feature, please input 0 to disable this feature. (This feature is only available for DRM-X Business Account users.)

Congratulations! You finished integrating your Joomla with DRM-X now.

You really did a good job 😊

All your users register on your Joomla website will be synchronized to your DRM-X account. So you can manage your users both on Joomla

and DRM-X.com easily.
