Overview

Haihaisoft Universal Player is a powerful media player which supports playing almost all the media formats and the DRM encrypted files that protected by DRM-X platform which is the most powerful and comprehensive DRM system in the world.

Haihaisoft Universal Player can play WMV (Windows Media Video), WMA (Windows Media Audio), ASF, WMS, DVD, VCD, SVCD, MOV, RM, RMVB, AVI, MPEG, WMV, 3GP, FLV, SWF, MP3, MP4, AMR, M4A, ACC, OGG, MIDI, GIF and JPEG file format and so on. Haihaisoft Universal player supports more than 400 formats now and keeps increasing number day by day.

Haihaisoft Universal Player contains three types of skins now. Users can choose the one they like as playing media.

The player also opens the source of the skin, so users can design their own skins by themselves.

Haihaisoft Universal Player has been downloaded around one million times worldwide until November 6th. It is becoming more and more popular, and attracting more users.

2. **Install**

Click the installer you download and follow the setup wizard, you will install the player successfully.

Start Haihaisoft Universal Player

There are several ways to start Haihaisoft Universal Player. You can start it the same way you start other programs (such as Haihaisoft PDF Reader, Microsoft Word and so on), or from a shortcut icon on your desktop. The following procedure shows an easy and sure-fire way to start it.

To start the Player

1. On the taskbar, click **Start**.
2. Point to **All Programs**, and then click **Haihaisoft Universal Player**.

Switch to a Tab to Simplify a Task

The tabs on the Player taskbar allow you to focus on a specific task, as shown in the following screen shot.

You can switch to a tab to see a view that targets the task you want to

complete. The arrow that appears below each tab provides you with quick access to options and settings for that task. For example, the arrow below the **Menu** tab shows you the main menu you can choose in the player, as shown in the following screen shot.

As you play videos and songs in the Player, you can use the **Back** and **Forward** buttons to view the next and previous files, as shown in the following screen shot.

Change the skin of the Player

Haihaisoft provides three types of skins for the player now, as shown in the following screen shot.

- Media Player

- Ice-Blue

- QQ Player

You can change the skins of the player whenever you want. Here are the steps:

1. Click the **Menu** button and choose the **Skin** in the drop down list, as shown in the following screen shot.

Then the skin will be changed into the one below:

Right click on the screen of the player with the new skin, and then you will see the same menu as the drop list on the default skin, as shown in the following screen shot. Here we choose the new skin –

QQPlayer.

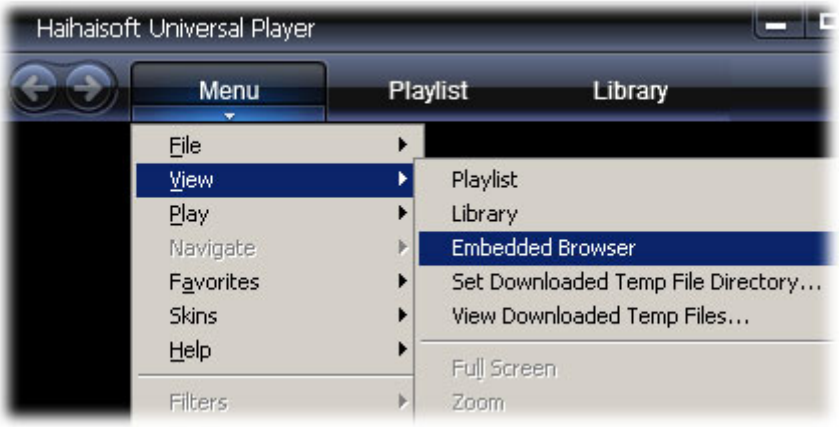
Here, we will see the new skin as below.

In the same way, right click on the screen, choose the **Skins**, and then click the **Media Player11**, you will get back to the default skin, as shown in the following screen shot.

Open the Embedded Browser in the Player

We can use the embedded browser in the player to access the webpage which you want. It will make it easier if you want to surf on internet when you play media.

Click the **Menu** button or right click on the player, choose the view selection in the drop down list, as shown in the following screen shot.



Then you will see the embedded browser, just as shown below.

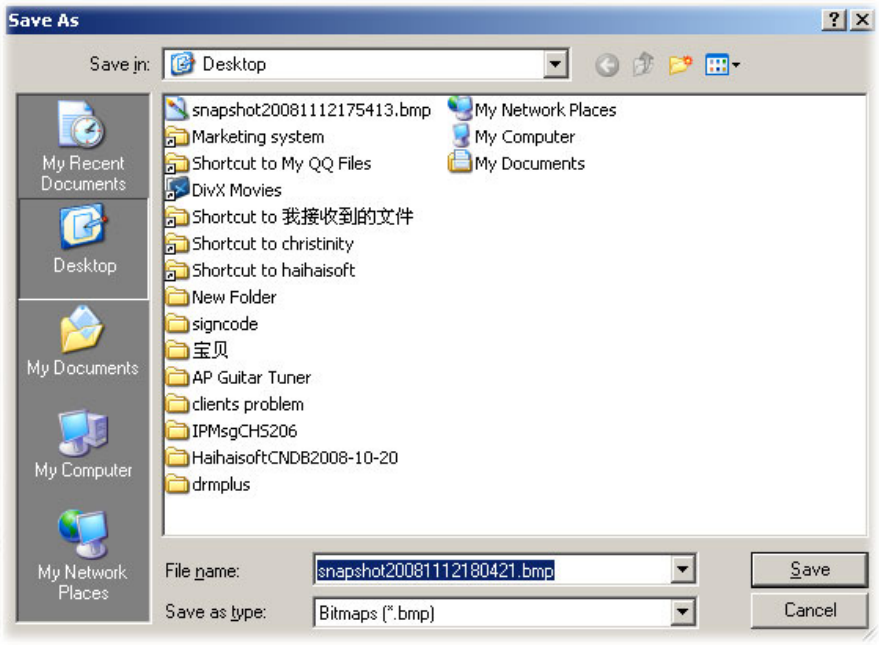
The default homepage is http://www.haihaisoft.com. You can enter any webpage page URL in the address bar. It's very easy☺

Save image of the video played in the player

In Haihaisoft Universal Player, you can save an image of the video easily and comprehensively.

Click the **Pause** button in the player or just one click on the screen directly on the screen which you want to save it as a picture. Then right click on the screen and move your mouse on the **File**, then choose the selection of **Save Image** in the menu list, as shown in the following screen shot.

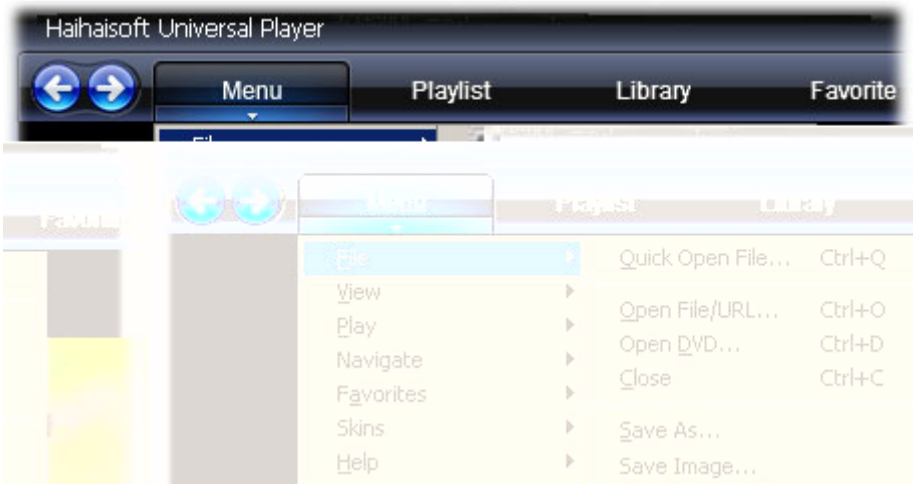
Rename the picture and choose the folder where you want to save it.



Now, you can open the image you need, just as shown below.

Save Thumbnails of the video

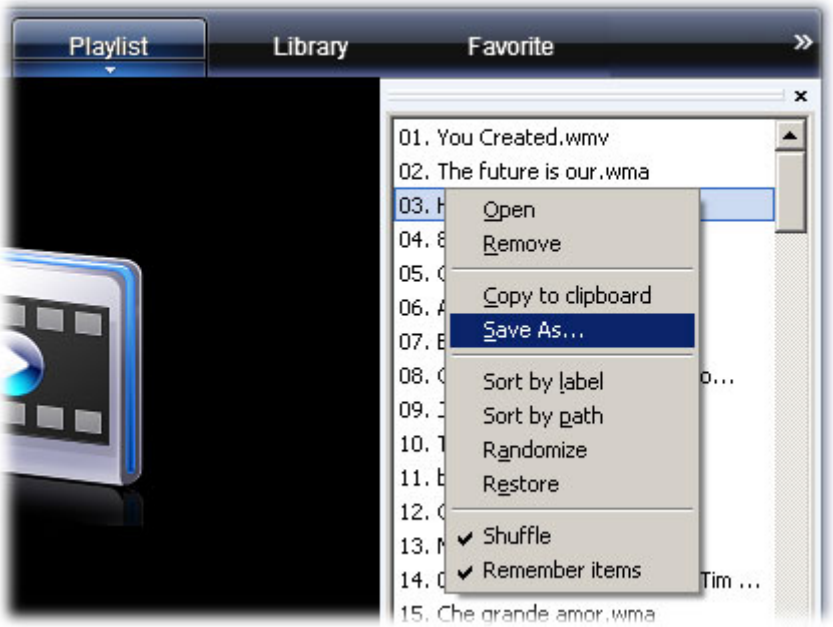
Click the **File** in the **Menu** drop list, then you will see the Selection of **Save Thumbnails**, as shown in the following screen shot.



After few seconds, you will see the thumbnails of the video,

You can add or remove items and move them around in the List pane whenever you want.

You have the right to save the playlist. Right click on the List pane, and then click the **Save as…** selection, as shown in the following screen shot.



Save the playlist wherever you want, it will be saved in the file ended with ***.huppl***.

You just need to open the playlist with Haihaisoft Universal Player, and then can play all the media files at once.

Menu

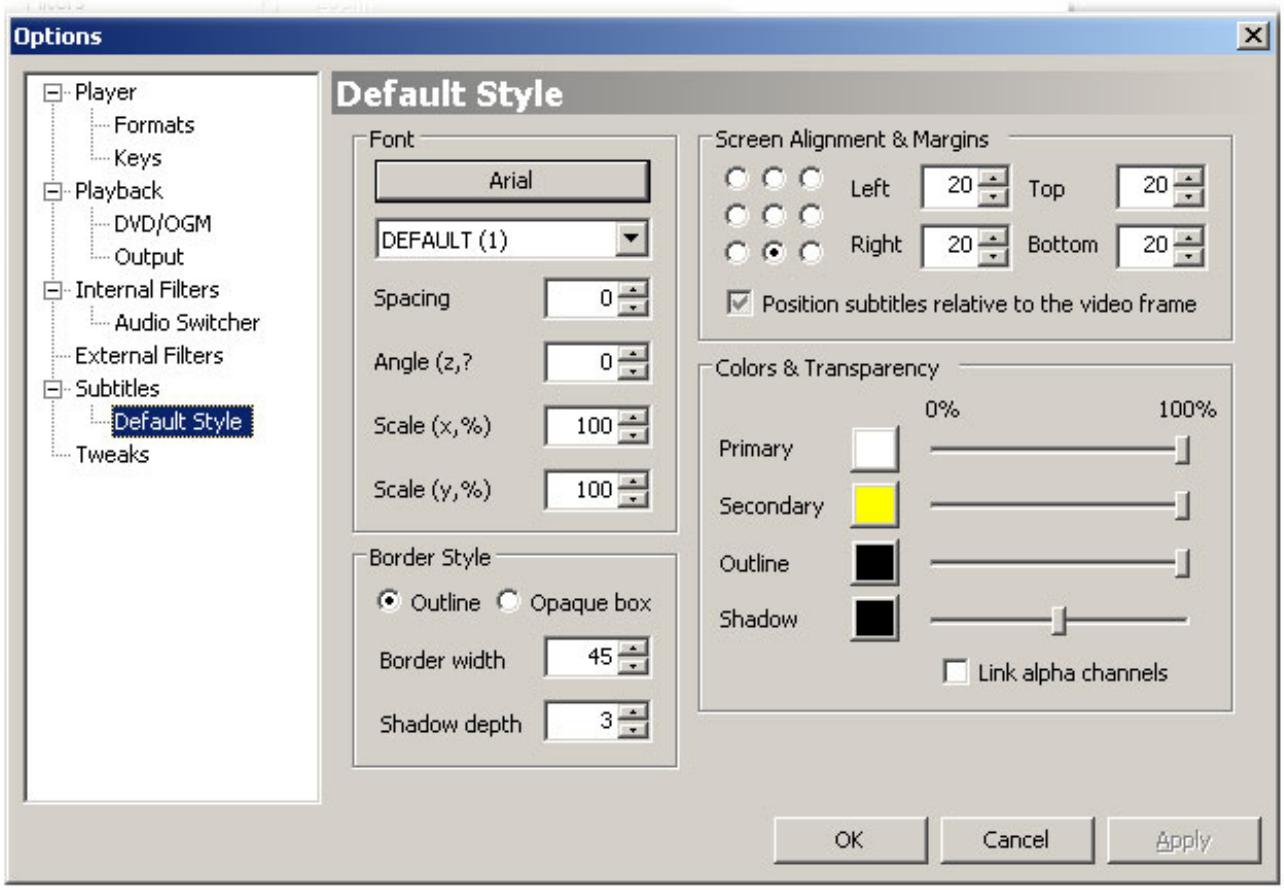
Now, let's learn some features that maybe very useful when you play music or videos through Haihaisoft Universal Player.

Options

Open **Options**

- On the taskbar, click **Menu** button or just **Right click** on any part of the player.
- Move your mouse on the **View** selection, and then you will see the **Options…**, as shown in the following screen shot.

Click it, and then you will see the **Option**s editing window as shown below.



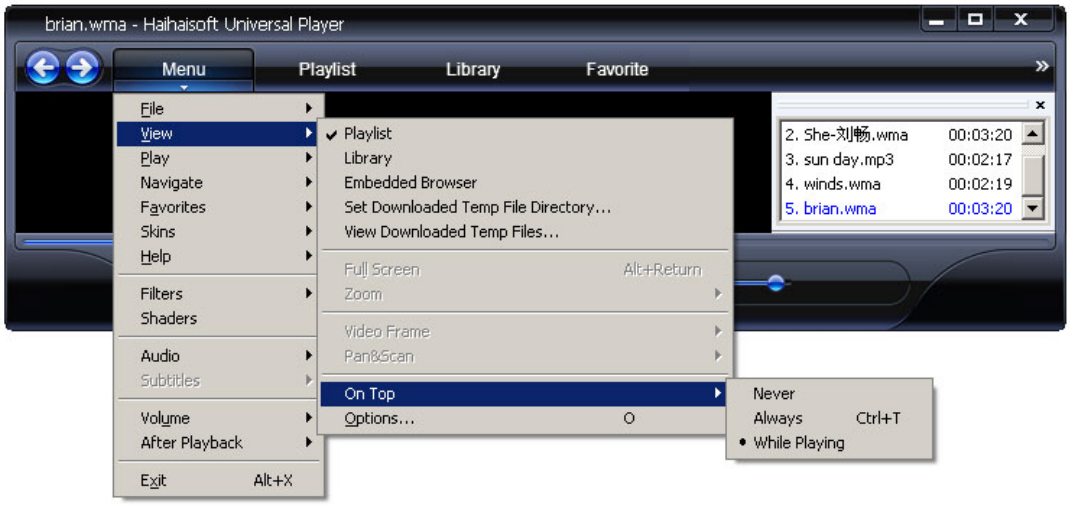
In the dialogue, you can modify the settings as you like, such as the **Volume, Balance, Subtitles, Formats, Playback** and so on**.** It is very easy to do it, have a try^_^

On Top

This function is very useful for watching movies when do something else on you computer, like surfing online and so on.

Now let's go and find out how to set it.

- On the taskbar, click **Menu** button or just **Right click** on any part of the player.
- Move your mouse on the **View** selection, and then you will see the **On Top,** as shown in the following screen shot.



Here you will see three options for the **On Top** feature.

- **Never**
- **Always**
- **While Playing**

Choose the one you prefer.

After Playback

You can ask the player what to do after finish playing the files.

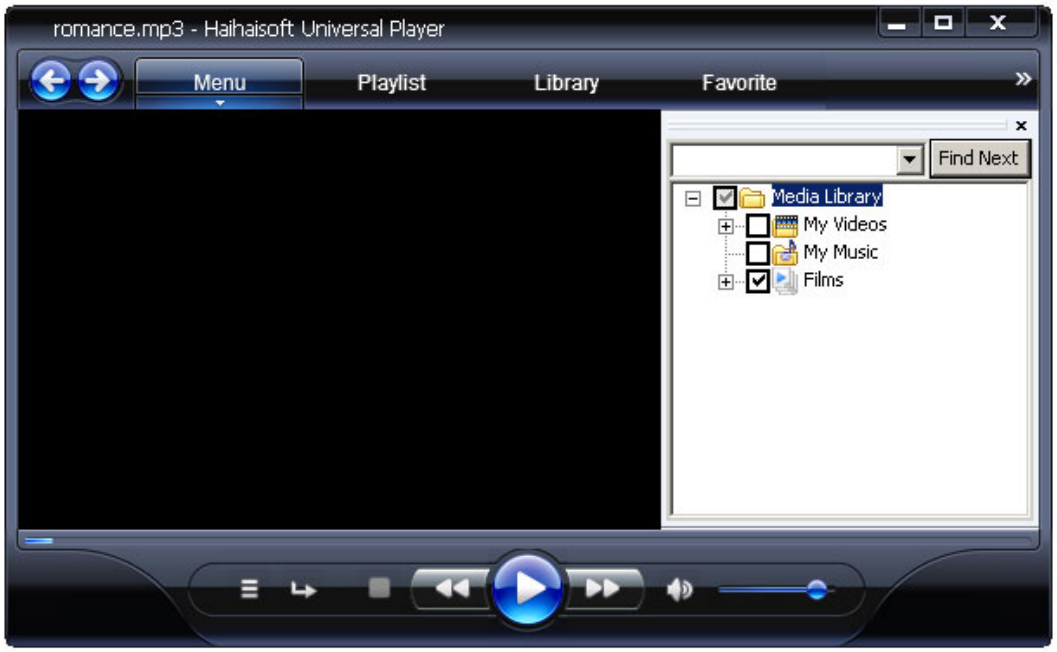
- On the taskbar, click **Menu** button or just **Right click** on any part of the player.
- Move your mouse on the **After Playback** selection, and then you will see the selections for it, as shown in the following screen shot.

- Close – Close player after playing.
- Stand By – Make your computer stand by after playing.
- Hibernate – Make your computer hibernate after playing.
- Shutdown – Make your computer shutdown after playing.
- Log Off – Make your computer log off after playing.
- Do nothing.

Library

Manage your media Library

Click the **Library** button on the taskbar, and then you will see **Library** in the left of the player, as shown in the following screen shot.



You can add unlimited multi-level folders into the **Library**. It will make your life much easier☺
