## Overview

---

Synchronize user integration is synchronizing the users register on your website into DRM-X platform. After being integrated, your users just need to register and login on your website to get the license for playing your contents protected by DRM-X.

DRM-X XML Web Service provides you with the interface that you can use to synchronize your users into DRM-X platform.

It is very simple. All that you need to do is just to call some functions, like [AddNewUser](#) and [UpdateUser](#). You can get the details about DRM-X Web Service by visiting the link below:

<http://www.drm-x.com/haihaisoftLicenseservice.aspx>

## What necessary before integration?

---

### 1. DRM-X Account

You need to have a DRM-X [Premier Account](#) or a [Business Account](#) before you can integrate with your platform. DRM-X personal account users can manage it's users on DRM-X.com instead.

Click the link below to see the DRM-X Account Comparison,

<http://www.drm-x.com/Fees-Compare.aspx>

### 2. User database, login page and register page.

You should setup a database or you may already have a database that can store your users' information if you want to integrate with DRM-X platform. You also need to [create or modify your current user](#)

login page and register page for your users to login and register.

## Parameter Introduction

The parameter in **blue color** is required field. You can set the others into 'N/A' (means empty) or enter the correct value.

- **AdminEmail:** your login Email of DRM-X Account.
- **WebServiceAuthStr:** the Web Service Authenticate String for DRM-X web service. The value you set here must be the same with the one on your DRM-X account.

Steps to set:

1. Login your DRM-X account.
2. Click the **Account Settings** in the left panel and choose the **Website Integration Preferences**, as shown in the screenshot below:

DRM-X.com Formerly XDRM

3. Select **Synchronize User Integration** and, enter the **Web**

**Service Authenticate String.** As shown in the screenshot below:

Integration Method: [Integration Help](#)

Synchronize user integration     Custom login page integration

Note: Synchronize user integration is synchronize your website users to DRM-X.com your user. We protect the passw easy. (Recommend for most users)  
 Custom login page integration is when user acquiring license, it will pop up your website DRM login window to acc DRM login page. It requires more code work. (Not Recommend, only for advanced users)

Please set a Web Service Authenticate String for DRM-X web service (DRM-X need you provide this

   Note: the value you enter here must be same with the one you set in the code on your sign up page.

4. Click the **Submit** button below and you will get the message shown on the picture below:

**Profile - Website Integration Preferences**

You have updated Website Integration Preferences successfully.

Integration Method: [Integration Help](#)

Synchronize user integration     Custom login page integration

Note: Synchronize user integration is synchronize your website users to DRM-X.com your user. easy. (Recommend for most users)  
 Custom login page integration is when user acquiring license, it will pop up your website DRM DRM login page. It requires more code work. (Not Recommend, only for advanced users)

- **GroupID:** the ID of your Group created in your DRM-X account. You can find GroupID value in Users Group of DRM-X Account.

| My Account          | My Groups |                    |                       |
|---------------------|-----------|--------------------|-----------------------|
| Account Home        |           |                    |                       |
| <b>User Group</b>   |           |                    |                       |
| Rights              |           |                    |                       |
| License Profile     |           |                    |                       |
| Users               |           |                    |                       |
| Reports             |           |                    |                       |
| Account Settings    |           |                    |                       |
| Protect Audio/Video |           |                    |                       |
|                     | Group ID  | Group Name         | Group Users           |
|                     | 89029     | Default User Group | <a href="#">Users</a> |

Note: in the code you just need to enter one Group ID, and the users signed up on your website will be added into group directly. You can

manually change the group they belong to in your DRM-X account if you want.

- **UserLoginName:** the username or unique UserID in your user database.
- **UserPassword:** the Password of user in your user database.
- **UserEmail:** the Email of user in your user database.
- **UserFullName:** the Full Name of User. This parameter is option. You can leave this UserFullName parameter to blank, or just set it value to N/A.
- **Title**
- **Company**
- **Address**
- **City**
- **Province**
- **ZipCode**
- **Phone**
- **CompanyURL**
- **SecurityQuestion**
- **SecurityAnswer**
- **SecurityQuestion**
- **IP:** address of your user which acquire license. You can provide this Parameter, or input N/A.
- **Money:** the money amount of your users at DRM-X.com. By default, you can set this value to 0, and manually change the value on DRM-X. (Required field)
- **BindNumber:** the number of computers that you allow the users to login and play your content. It is a useful way to prevent your users with sharing their accounts. [See the details](#)  
By default, you can set this value to '0', and manually change the

value on DRM-X. (Required field)

- **IsApproved:** Set whether the user is approved immediately after they register. Please set "yes" if you approve user to login, otherwise set "no". The default value should be "yes"
- **IsLockedOut:** Set whether the user is locked out immediately after they register. Please set "yes" if you want to lock out user, otherwise set "no". The default value should be "no"

## **Download Sample Code**

You can download the sample pages by clicking the link below:

[http://www.drm-x.com/download/ScynUser\\_PHP\\_Sample\\_Code.rar](http://www.drm-x.com/download/ScynUser_PHP_Sample_Code.rar)

## **Step by Step Introduction**

**Step1. Open your User Sign Up page by editor tool.**

**Step2. Download nusoap.php classes.**

Here is the download link to the file:

<http://www.drm-x.com/download/nusoap.txt>

Please rename the file into '**.php**' extension after you download it.

To see the instruction about nusoap.php, please [click here](#).

**Step3. Add the code below into your sign up page.**

```
<?php
require_once('nusoap.php');
// Please input the relative URL to your nusoap.php downloaded just
now in the ("").
$wsdl="http://www.drm-x.com/haihaisoftlicenseservice.asmx?wsdl";
$client=new soapclient2($wsdl, 'wsdl');
/*Before you using the following code, please make sure you set the
variable value for:
$AdminEmail, $WebServiceAuthStr, $GroupID, $user['username'],
$user['password'], $user['email'], $user['name'], $Money,
$BindNumber */
$client->soap_defencoding = 'UTF-8';
$client->decode_utf8 = false;
$params = array(
    'AdminEmail' => $AdminEmail,
    'WebServiceAuthStr' => $WebServiceAuthStr,
    'GroupID' => $GroupID,
    'UserLoginName' => $user['username'],
    'UserPassword' => $user['password'],
    'UserEmail' => $user ['email'],
    'UserFullName' => $user['name'],
    'Title'=>'N/A',
    'Company' => 'N/A',
    'Address' => 'N/A',
    'City' => 'N/A',
    'Province' => 'N/A',
    'ZipCode' => 'N/A',
    'Phone' => 'N/A',
    'CompanyURL' => 'N/A',
```

```
'SecurityQuestion' => 'N/A',
'SecurityAnswer' => 'N/A',
'IP' => $_SERVER['REMOTE_ADDR'],
'Money' => $Money,
'BindNumber' => $BindNumber,
'IsApproved' => 'yes',
'IsLockedOut' => 'no'
);
$result = $client->call('AddNewUser', array('parameters' => $param),
", ", true, true);
$message= $result['AddNewUserResult'];
?>
```

After calling the **AddNewUser** function, it will return '1', which means have added the new user successfully, or it will return an error message.

#### **Step4. Run the sign up page.**

Try to register a new user on the sign up page. If you receive '1', that means you have added the new user successfully on DRM-X platform already. Please check your users' database to see if the user also has been added.

#### **Step5. Play your contents protected by DRM-X.**

Congratulations! Till now, the integration has been done. The users who register on your website will be synchronized into your DRM-X account either. When they open your encrypted content, they can

enter their username and password in the Login window directly to get a license. They don't need to register again on DRM-X.com.

### **Step6. Customize the Login page above.**

You can customize the pop up login window of DRM-X. So your users can see more your company's information on it and will also make them easier to link to your website. You can set the information including your company's name, logo, website URL, and product name and so on.

- [Download the tutorial](#)

## Add your existed users to DRM-X.com

For adding your existed users to DRM-X.com, you need to create a loop program to read user information from your database, and then call the **AddNewUser** function to synchronize the users to DRM-X.com. In this way, you need to transfer non-encrypted password to DRM-X.com, and DRM-X will encrypt the password with strong MD5 encryption.

## Update User Information

Just like calling the **AddNewUser** function in your sign up page, you can also call the **UpdateUser** when they update his or her profile in your website.

Calling **UpdateUser** function is very similar with calling the **AddNewUser** function. You can read the XML web service document from here, and use the **AddNewUser** code in the above code.

<http://www.drm-x.com/haihaisoftLicenseservice.asmx?op=UpdateUser>
